

# Assaignment-3

## Question 1

Write the program for deleting an element from the beginning and from any position.

```
#include <iostream>
using namespace std;
int main()
{
    int arr[5] = {}; //1
    cout<<"Enter 5 elements\n"; //2
    for(int i=0;i<5;i++)
    {
        cin>>arr[i];
    }
    int ind, maxsize=5; //3
    cout<<"Enter index to be deleted\n"; //4
    cin>>ind;
    if(ind<0 || ind>=maxsize) //5
    {
        cout<<"Invalid\n";
    }
    else
    {
        for(int i=ind;i<=maxsize-1;i++)
        {
            arr[i]=arr[i+1];
        }
        arr[maxsize-1]={};
    }
    cout<<"Array is:\n"; //6
    for(int i=0;i<5;i++)
    {
        if(arr[i]!='\0')
            cout<<arr[i]<<" ";
    }
}
```

## Question 2:

Write the program for printing the array after rotating it k times towards left, where k would be taken as user input.

```
#include <bits/stdc++.h>
using namespace std;
int gcd(int a, int b)
{
    if (b == 0)
        return a;
    else
        return gcd(b, a % b);
}
void leftRotate(int arr[], int d, int n)
{
    d = d % n;
    int g_c_d = gcd(d, n);
    for (int i = 0; i < g_c_d; i++) {
        int temp = arr[i];
        int j = i;
        while (1) {
            int k = j + d;
            if (k >= n)
                k = k - n;
            if (k == i)
                break;
            arr[j] = arr[k];
            j = k;
        }
        arr[j] = temp;
    }
}
void printArray(int arr[], int size)
{
    for (int i = 0; i < size; i++)
        cout << arr[i] << " ";
}
int main()
{
    int arr[] = { 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 };
    int n = sizeof(arr) / sizeof(arr[0]);
    int k;
    cout << "Enter k" << endl;
    cin >> k;
    leftRotate(arr, k, n);
    printArray(arr, n);
    return 0;
}
```
